

Markdown Language

1. What is Markdown?

Markdown is a lightweight markup language used to format text for documentation.

It is mainly used for:

- `README.md` files
- Project documentation
- GitHub repositories
- Technical reports

File extension:

```
.md
```

Example:

```
README.md
```

2. Headings

Use `#` symbol.

```
# Heading 1
## Heading 2
### Heading 3
#### Heading 4
```

More `#` means smaller heading.

3. Text Formatting

Bold

```
**Bold Text**
```

Italic

```
*Italic Text*
```

Bold + Italic

```
***Bold and Italic***
```

Strikethrough

```
~~Deleted Text~~
```

Result:

~~Deleted Text~~

4. Lists

Unordered List

- Item 1
- Item 2
- Item 3

Ordered List

1. First
2. Second
3. Third

Nested List

1. Java
 - OOP
 - File Handling
 2. Python
 - ML
 - Data Science
-

5. Code Formatting

Inline Code

```
`git clone`
```

Code Block

```
```bash
git add .
git commit -m "message"
git push
```
```

6. Links

```
[GitHub](https://github.com)
```

7. Images

```
![Alt Text](image.png)
```

You can also use image URL:

```
![Logo](https://example.com/logo.png)
```

8. Horizontal Line

```
---
```

9. Tables (Very Important for Documentation)

Tables are used to organize structured information.

Basic Table Syntax

```
Name	ID	Department
Rahim	101	CSE
Karim	102	EEE
```

Result:

| Name | ID | Department |
|-------|-----|------------|
| Rahim | 101 | CSE |
| Karim | 102 | EEE |

Table Alignment

```
Name	Marks	Grade
Rahim	85	A
Karim	75	B
```

Explanation:

- `:-----` → Left align
- `:-----:` → Center align
- `-----:` → Right align

10. Task List (Checkbox)

Useful for project tracking.

```
- [x] Install Git
- [x] Create Repository
- [ ] Complete Documentation
- [ ] Final Submission
```

Result:

- Install Git
- Create Repository
- Complete Documentation
- Final Submission

11. Blockquote

Used for notes or warnings.

```
> This is an important note.
```

Result:

 This is an important note.

12. Escaping Characters

If you want to show symbols like `#` or `*`, use backslash:

```
\# This is not a heading
```

13. Automatic URL Linking

Just paste URL:

```
https://github.com
```

GitHub automatically makes it clickable.

14. Documentation Structure Example

A good README should include:

```
# Project Title

## Description
Short explanation about project.

## Features
- Feature 1
- Feature 2

## Installation
```

```
```bash
git clone repository_link
cd project_name
```

## Usage

Explain how to run project.

## Technologies Used

- Java
- Python
- MySQL

## 15. Advanced Documentation Tips

1. Keep headings clear and structured.
  2. Use tables for structured data.
  3. Use code blocks for commands.
  4. Use task lists for progress tracking.
  5. Keep README simple but informative.
  6. Always preview before pushing to GitHub.
